Digital Supply Chain Senior
Advisor, USAID, United
States

Enabling a Market-Based Approach to Manufacturing Quality-Assured Health Products in Africa: A Differentiated Coordination Approach

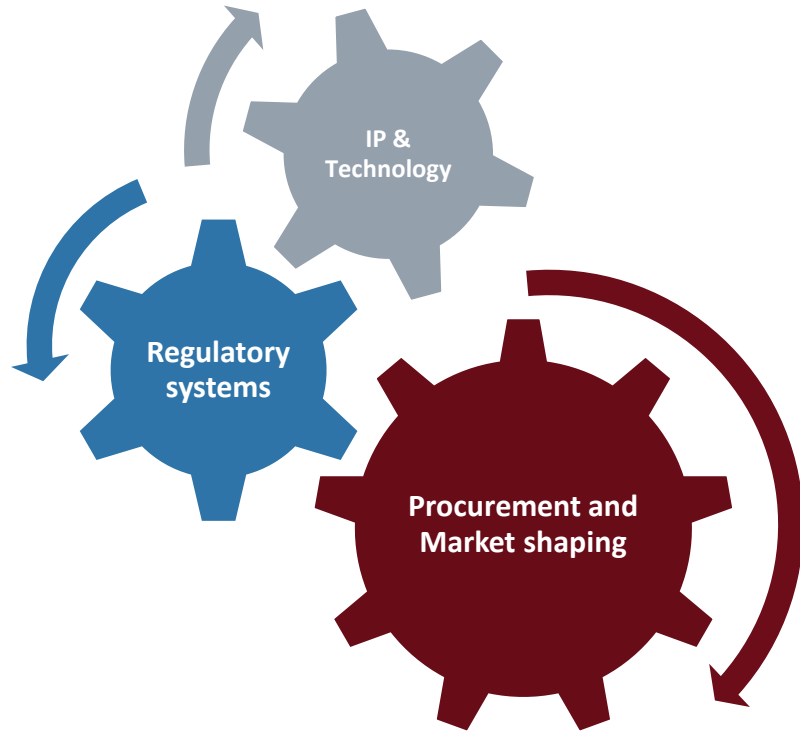

Context: Multiple Regulatory and Procurement mechanisms

Who does what
What adds value
Where do we start
How do we build

Market-based approach to enhancing regional manufacturing in Africa

- ❖ Optimization of existing or prospective national, regional, and continental mechanisms
- ❖ Promotion of specialization and value contribution of all mechanisms
- ❖ Removal of redundancies and overlap in roles and scope of operation
- ❖ Reduction of nationalism and protectionism in policy, regulations, and practice
- ❖ Promotion of reliance and recognition of the policies and operations of procurement and regulatory mechanisms
- ❖ Facilitation of inclusive participation, coherence, and ownership across member states, industry partners, development institutions, and other supporting institutions
- ❖ Facilitation of capacity building and systems strengthening through peer learning, technical assistance, and mentorship
- ❖ Modification of existing policies at the country level and in procurement practices of all institutions to align with AfCFTA principles

Differentiated coordination of procurement and regulatory mechanisms – Illustrative (Africa)
